

# TAYLOR MOTLEY, PE

STRUCTURAL ENGINEER

## PERSONAL PROFILE

Taylor Motley, PE, is an accomplished Structural Engineer with a concentrated expertise in building design and specialty engineering services. With over 15 years of experience, Taylor has honed his skills in a range of structural design areas, from conventional building design to the more specialized realms of light gauge design, delegated steel services, connection design, and stair design.

Taylor's passion for engineering precision and architectural aesthetics is evident in his work. His projects often exemplify the blend of functionality and form, consistently meeting the client's requirements while adhering to stringent safety standards. His proficiency in specialty engineering, particularly light gauge and steel connection design, sets him apart as a specialist in his field.
